DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2173

2. Claims 1-3 are rejected under the judicially created doctrine of double patenting over claims 1-5 of U. S. Patent No. 6,219,045B1 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: An apparatus for interaction between a plurality of users in a three-dimensional, computer-generated graphical space..

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See also MPEP § 804.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2173

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiio et al. (US Patent No. 5,491,743).

Regarding claim 1, An apparatus for interaction between a plurality of users in a three-dimensional, computer-generated graphical space, comprising: a plurality of client processes, wherein each client process is executed on a digital computer distinct from the digital computers executing others of the plurality of client processes; a central server process, executed by a server computer; a network coupling the server computer to the digital computers which execute the plurality of client processes, thereby coupling the plurality of client processes with the central server process (see col. 5, lines 42-62); a plurality of user objects, executed as subprocesses of the central server process, wherein each of the plurality of user objects is associated with a user in the plurality of users (see col. 7, lines 1-62); an environment database, accessible by each client process; means for communicating a position of a particular user in the three-dimensional, computer-generated graphical space from the particular user's client process to the other client processes via the central server process, the means for communicating programmed according to a protocol (see col. 10, lines 23-65); means, on a digital computer executing the particular user's client process, for receiving positions of the users of the other client processes according to the protocol via the central server process; and means, on the digital computer executing the particular user's client process, for rendering a three-dimensional view

Art Unit: 2173

from a viewpoint of the location of the particular user, the rendered view including at least one object from the environment database and, when other users are at locations viewable from the rendered viewpoint, including those other viewable users (see col.16, lines 8-65).

Regarding claim 2-3, Shiio discloses wherein the environment database comprises a single central environment database; and wherein the environment database comprises one copy of the environment data at each of the plurality of client digital computers (see figures 3-14).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (See PTO-892).
